

MYFLEET

Fleet management system

Track, monitor & maintain your fleet

MYFLEET

Overview

MYFLEET is an uninterrupted fleet tracking and management system which enables businesses to supervise their vehicles, enhance fleet performance and communicate with all the members in the fleet anytime, anywhere and on any device.

MYFLEET is addressed to any business, regardless of activity, that owns one or more vehicles. The business has the ability to track and monitor its fleet's movements, maintenance, assignments and operations in real-time through GPS technology. The system is placed to an independent number of vehicles and offers live display on the map for all the vehicles.

Vehicles are a mission-critical part of everyday business activities, so better visibility leads to better business decisions.

Features & Capabilities

VEHICLE STATUS & LOCATION

Vehicles' tracking on digital maps in real time and actual information about the vehicle's speed, direction of movement, engine status and idle time.

ROUTE OPTIMIZATION

Automatic optimal route calculation by selecting the customers or the areas that the vehicle should visit, in order to eliminate unnecessary movements and fuel consumption.

FUEL CONSUMPTION CONTROL

Full control of each vehicle's fuel consumption so that the fleet runs as efficiently as possible.

HISTORY OF ITINERARIES

Control of the compliance to the planned itinerary through history data paths providing a detailed analysis of the movements, the attitudes and the visits to customers.

SENSOR CONNECTION

Reading data (such as temperature, humidity, etc.) from sensors and analytic presentation of all information in the form of reports and graphs.

STATISTICS

Detailed statistics to provide the overall picture of vehicle mobility with reference to the cost of fuel and the visits to customers.
